# SharePoint Services Overview

## Gain from our Experience,
## Achieve your SharePoint Goals

A partnership with Overture is a pledge to the success of your SharePoint investment. As a Microsoft Certified Partner, Overture offers end-to-end SharePoint services and solutions, delivered either On-Premise or remotely. Our SharePoint experts have extensive experience delivering SharePoint engagements across industries including legal, healthcare, hi-tech, manufacturing, telecom, retail, and utilities; for small to large organizations and government agencies from coast to coast. Whatever your SharePoint goals may be, Overture's global expertise will help you realize them on time and within a manageable budget.

## SharePoint Health Check

When it comes to SharePoint, we at Overture understand that "One-size-fits-all" doesn't apply to all businesses. We provide a comprehensive SharePoint Health Check to ensure a robust environment that meets your business goals. Backed by years of experience, our SharePoint experts can quickly identify changes that will deliver improved performance, stability, and the results that you always wanted.

Our specialized multi-point health check and audit allows us to review your specific needs and challenges, analyze your current environment, and outline the right solutions for the short and long-term goals. Our insights also include recommendations on the most suitable technical platform for your business, whether it's on-premise, hosted, Office 365, or a hybrid approach.

**Define & Plan** → **Discovery** → **GAP Analysis** → **Solution Analysis** → **Advise**

*Immediately following completion of our Health Check, you will receive our recommendations and a clear, concise strategy and cost estimate derived from best practices and our expertise.*

## Development & Implementation

Success depends on the right combination of technology, strategy and implementation. We integrate these critical ingredients to develop a customized solution for your organization, building on out-of-the-box features to achieve increased ROI more rapidly.

- ☑ Governance and workflow models
- ☑ Hybrid and multi-tenant solutions
- ☑ Content Management Systems (CMS)
- ☑ Public-facing websites
- ☑ Intranet and Extranet portals
- ☑ Custom apps and WebParts
- ☑ Integration with ERP. CRM, etc...
- ☑ Enterprise Search solutions

## Business Intelligence

The best decisions are made using the best business intelligence (BI). Overture will help you leverage SharePoint to derive and merge critical data from the applications you already use, ensuring that you get the information you need, when you need it and in the format you want. From project reports to sales projections, a SharePoint Business Intelligence solution can help your organization easily mine those valuable nuggets of critical enterprise data.

## Migration & Upgrade

A seamless upgrade or migration to SharePoint is always the top priority for us to ensure minimal disruptions to your business. Overture's expertise in Microsoft SharePoint technology framework helps you avoid common pitfalls and transition challenges during a SharePoint implementation or upgrade, including disintegration of data and content. We also help you put the right planning and strategies in place to deliver a smooth transition from legacy systems like Exchange Public Folders, File Shares, or Lotus Notes to SharePoint or Office 365.

## Managed Services

At Overture, we are all about helping make the most of your SharePoint investment. We will help you optimize your SharePoint environment by giving you access to the IT resources you need—when and where you want them. Plus our dedicated team can implement the right managed services model to help you run an efficient SharePoint environment be it on –premise, cloud or hybrid.

A partnership with Overture Consulting is a pledge to the success of your SharePoint project. As a Microsoft Certified Partner, Overture offers end-to-end SharePoint services and solutions, delivered either On-site or remotely. Our innovative team has extensive experience delivering projects across industries including healthcare, hi-tech, pharma, manufacturing, telecom, retail, financial, and Government.
